

QUALITY POLICY

Osnago, March 30th, 2018

For over 60 years FOMAS Group is specialized in manufacturing high quality forgings and seamless rolled rings, in ferrous and non-ferrous materials, used for a wide range of applications in high technologically advanced industrial fields.

As a result of continuous development and innovation, FOMAS Group expanded its activity in 2017 to the production of metallic powders mainly intended for the growing sector of additive manufacturing.

FOMAS Group's companies share one **mission**: consolidate and continuously increase their position of **excellence**, recognized by customers, competitors and suppliers worldwide.

For this purpose, the commitment of the Top Management is constantly focused to ensure:

- high product quality, in compliance with customer and other relevant interested parties requirements;
- continual development of know-how and know-why;
- on time delivery with a short lead time;
- tailored made service based on customer's requests;
- flexibility of mindset, organization and equipment;
- a strong focus on problem solving, where competence, ability to find solutions and lessons learned from past experiences are key factors;
- innovation capacity;
- an attitude shared by all the organization (**excellence in every function and process**) and a mutual vision of the corporate objectives;
- development, implementation and **continual improvement** of the effectiveness and efficiency of the quality management system, in accordance with ISO 9001:2015, ISO/TS 29001:2010 international standards, and, when required, with the nuclear Codes ASME III - NCA/WA-3800 and RCC-M, as well as the AS/EN 9100:2016 aerospace standard;
- the use of the management system to promote and support a strong **safety culture**, also shared with subcontractors, so that nuclear safety is integrated in all processes.

For achieving these objectives and goals, the Top Management considers essential:

- the enhancement, motivation and development of **personnel**, as well as their involvement to improve Quality;
- the **investments** in technological innovations;
- the continual development of **synergies** within the Group.

Furthermore, the Top Management undertakes to review the quality management system annually, to ensure its continuing suitability, adequacy and effectiveness, in order to increase customer and other relevant interested parties satisfaction.

The President
Massimo Guzzoni
